

Advantages: High Cut Rate, Uniform Scratch Pattern:

"Valgro-Fynex" Combi / Interleaved Mop Wheels are manufactured from closely packed strips of Valgro material, with an additional flap of coated abrasive between each layer. The interleaved flaps are then radially bonded to a resin core and mounted on a spindle.

Specific Applications:

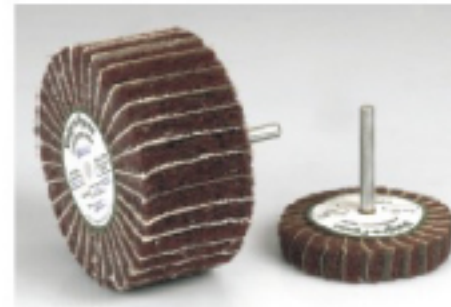

- Removing paint and conditioning surface on aircraft, boats, garage door, windows, etc
- Deburring and satin finishing hard metals
- Weld removal and blending-in
- Removing heavy dirt and oxide before plating and painting.
- Heavy-duty cleaning inside cooling coils, pipes and tubing
- Light sanding of wood before lacquer.
- Cleaning stainless steel
- Deburring stamped and routed aluminium parts
- Deburring and grain-finishing stainless steel sheets after conventional coated abrasives
- Satin finishing of large surfaces

Suitable Machines:

Portable power / pneumatic tools of various types with collets fixing / drill.

Combi Mop Wheels

Features	Benefits
* Constructed of "Valgro" non-woven and coated abrasives material	* Provides blending action while leaving the final finish on the work piece
* Improved heavy duty non-woven material	* High durability * Resistance to smearing
* Permanently affixed 6 mm shank	* Consistent finishes
* Smear- resistance	* Secure, safe attachment provides smooth running and ease of control for "off hand" operations
	* Clean, smear-proof work surface
