

**A Deburring Wheel that Cuts a Whole Lot Faster!
A Wheel That Runs Much Cooler !!
Four Wheels That Run at Top Speed !!!**

An excellent starting point for New Generation requirements of medium to heavy Deburring.

Typical Users:

Manufacturers:

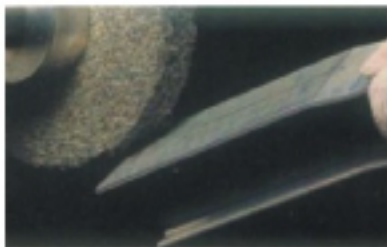

Aerospace component manufacturers (Blades, Vanes, Rotors, Housings, Fasteners, Airframe Parts, Extrusions, Control Surfaces, Rocket Cans, Nozzles, Valves, Etc).

Other Manufacturers : Hand tools, Building and Furniture hardware, Machinery Instruments, Surgical Instruments, Engines and Components, Formed wire products, Aluminum extruders, Automobiles Equipment, etc.

Typical Applications :

- Hole deburring on machined or formed parts
- Deburring of shear edges, Keyways
- Removing wire edges from surgical instrument
- Deburring stainless steel piston rings, machined parts, gears, auto and appliance trims, aluminium extrusions, gas turbine blades, aircraft wing spares
- Removing Microburr, Carbon & Black heat spots
- Deburring aluminum die-cast flashing
- Refining surface of jet blade airfoils
- Removing parting lines from cast turbine blades and vanes
- Blending Coated abrasives' scratch marks

Series 4000 & 5000 :

Cut & Polish Wheels

Series 6000 Wheels: Dynamic improvements in cutting rate

- * Reduces heat & smearing problems.
- * Helps you clock more parts per hour.
- * The cushion in these wheels hold sharpness longer.

Product Description	Width	OD 150 mm	OD 200mm	OD 300mm
