

Active Prevention of Undercutting & Gouging:

"Valgro-Fynex" Unitized Mops & Wheels are made from high durability unitized material. It can be shaped or profiled for finishing and deburring of precision parts, and are perfect for those hard-to-reach areas. They will effectively improve the quality of finishing on any metal, without smearing.

Applications :

- Deburring and blending which requires high RPMs
- Decorative finishing which requires low RPMs
- Polishing which requires high speeds and low pressures
